

# Eco-Targets

*Designed and manufactured to any shape and size*

Precision Products' Eco-Targets are pre-assembled and can be quickly and easily deployed. Eco-Targets were developed to replace surplus vehicles and equipment used on the target practice range. The Eco-Target design is configured to utilize a series of interlocking slots and tabs. Our interlocking mechanisms help maintain integrity of the target configuration as ordinance is fired onto the targets. PPI Eco-Targets can be manufactured using AR500 or A36 steel. Our Eco-Targets can be designed and manufactured in any shape and size.

## Eco-Target Shapes (full & half size)

- ▣ BMP
- ▣ BRDM
- ▣ HMMWV
- ▣ Suicide Car
- ▣ T-72
